

Northeast Kingdom Lakeshore

Buffering Project

If you own waterfront property why not protect the lake or pond you enjoy?

Planting Riparian Buffers is a simple way to create solutions to pollution problems.

The Orleans County Natural Resource Conservation District can help you. We are offering an 80% paid cost share program to help you plant native trees and shrubs on your waterfront!

The benefits include; filtering of pollutants and sediment, stabilized banks, aquatic life improvement, wildlife habitat, and higher property value
